## General Characteristics

The Golden Eagle 421C is a piston powered, pressurized, cabin class aircraft. Although slower and smaller than its turboprop rivals, it is substantially less expensive to operate while offering comparable range and altitude.

Aircraft is currently located in Boulder, Colorado.

## Damage History

No known damage history.

## Disclaimer

The offer for sale of this aircraft is subject to contract and the aircraft may at any time be withdrawn from the market without prior notice. Specification is subject to verification by the purchaser and is not guaranteed for accuracy and Buyer should rely on their inspection as all aircraft are sold "as is, where is".
